Expanding Cat Hair Knowledge

Zinpro® continues to invest in building knowledge and expertise in supporting skin and coat health in pets. Most recently, Zinpro partnered with Summit Ridge Farms to explore the effect of Zinpro® ProPath® on hair growth, color and skin quality in cats. Results from the study showed a reduction in dander as well as less shedding at 45 days.

Reduced Feline Skin Dander Response

Reduced Feline Shed Hair Response

A key finding from the study was a better understanding of hair development in cats and ways to **better define success in the future.**

Zinpro ProPath Performance Mineral Recommended Rates for Feline Diets

Zn	Mn	Fe	Cu
100 ppm	15 ppm	80 ppm	12 ppm
